

Summary of Class 3

2018101075

Topic1: Australian Forest Fires

We discussed about the causes of Forest Fires. There are two causes, one is the Intentional cause as forest can be burnt by the industrialists or farmers to get the land or it can be natural causes like wind blowing in the summers which lead to burn due to friction produced.

Topic2: Wastage of Resources

We discussed about the wastage of resources and which activities lead to wastage of water. Growing rice and wheat consumes a lot of water. Then we discussed about our daily activities which lead to the wastage of water like bathing, washing clothes, washing utensils, etc.
