Topic : 1. How much is enough?

We saw two videos on this topic.

First one was of a thailand person on ted talks telling his story. He said that how people are making their life complicated and he left that complicated life and started farming and was able to make his house in just 3 months.

Then there was a second person. It was also a ted talk and he told about greedy and enough. Greedy is much more than enough. He talks about the parallel worlds in which one world is where a person who introduced greedy wins and other 'enough' one wins nobel. He talked about difference b/w gender wages and huge difference b/w ceo and workers.

2 .Can there be end to the requirements?

It's very hard. Once you have achieved something you want to get more. It never ends.
